The grandeur and beauty of Mount Fuji in summer

Instantly recognizable as the ultimate symbol of Japan's natural environment, Mount Fuji presents very different aspects every season. While forbidding and snow-capped in winter, in early summer its slopes take on a warm blue hue that, once seen, is never forgotten.

With its Asanoha, or hemp leaf patterned, dial and the inner bezel ring in ceramic, this limited edition GMT watch captures the color of 'Fuji-San' under a clear sky in early summer. It is presented on a stainless steel bracelet that is complemented by an additional leather strap. A limited edition of 900.
