

Experience the new Tokyo at cocktail hour.

While the 'old' Tokyo is as alive as ever, there is also a new Tokyo, vibrant, young and energetic. It has glamor during the day with its many bustling shopping areas and its skyline at night is filled to the horizon with an apparently limitless variety of tall office and residential buildings. Tokyo Bay glitters in the distance and all around you the streets are buzzing with the excitement of a city that

looks to the future. As you sip your Black Velvet, Irish Coffee or your Aviation, Tokyo at cocktail hour feels like the right place to be. This new Presage Cocktail Time design captures the moment. The long, elegant indexes catch the light, the richly textured sunray dial attracts the eye and the second hand curves down to follow the sloping contour of the dial.
