ASTRON

Astron GPS Solar. Precise, powerful and ultimately practical.

Seiko Astron GPS Solar is one of the world's most advanced wristwatches. It adjusts at the touch of a button to your time zone* by connecting to the GPS satellite network and, as it takes all the energy it needs from light alone and yet delivers the astonishing precision of an atomic clock. It even connects automatically up to twice a day to the satellite network to ensure its precision. It is the perfect timepiece for the global traveller.

The latest designs are as advanced as the technology within. The case has a solid feel and a low center of gravity. The bracelet has H-shaped links that wrap easily around the wrist. Both are made from high-intensity titanium, a long-lasting material that is 40% lighter than steel.

The sapphire crystal extends to cover and protect the bezel and the sharply cut three-dimensional markers and the long, bold hands ensure that the time can be read precisely at a glance.

The GPS Solar Astron 10th Anniversary Limited Edition

Leading the new collection is the 10th Anniversary Limited Edition. In the decade that has passed since the very first Astron GPS Solar, the range has been expanded with new calibers and designs, of which this commemorative watch is the latest. It, too, is in titanium and presents a sleek, contemporary aspect, with its grey and silver tones, the horizontal patterning of the dial and the Sapphire crystal bezel. It is offered in a limited edition of 1,500.
