

Sea, ice and time.

These three new Prospex diver's watches draw inspiration from the polar oceans and from the glaciers that have shaped the landscapes of the Arctic and Antarctic regions. The varied shades of glacial ice are reflected in the dials, from deep blue to white. Powered by Caliber 6R35 which delivers a power reserve of 70 hours, these watches join the Prospex

Save the Ocean series. The blue dial version is based on the design of Seiko's first diver's watch from 1965. The light blue dial features in a recreation of the legendary 1968 Hi-beat Diver's watch and the white dial is encased in the distinctive shape of the 1970 classic.

SPB297J1

Automatic | 6R35

Stainless steel case and bracelet with super-hard coating / Curved sapphire crystal with anti-reflective coating on the inner surface / Unidirectional rotating bezel / Screw case back / Screw-down crown / Case diameter 40.5mm / 200M Diver
